

What's the big idea?

ATTENTION: The Third Wave of Generational Wealth is exactly what you're looking for if you want a unique approach to financial freedom because nothing else has worked for you.

“Discover How To Use The Third Wave Secrets Of Economic Change So You Can Achieve Financial Independence And Time Freedom Sooner Than Previous Generations.”

There's a revolution taking place, but it's not the sort of revolution the mass media or conspiracy theorists are talking about. Nor is it the sort of revolution that involves pain and suffering...

...in fact it's the exact opposite.

It's an economic revolution that gives you the potential to create wealth faster than previous generations experienced.

The invention of agriculture and mass production assembly lines provided the means for earlier generations to create wealth through the creation of surpluses.

But, with the invention of computers, the Internet and artificial intelligence, a ‘the third wave’ of generational wealth is taking place.

And that's causing a rebirth in political, economic and financial systems all around the world.

All monetary economies are now experiencing change because old agriculture and industrially economies are rapidly being replaced by new knowledge-based economies.

This makes wealth through knowledge a speedier way for you to create generational wealth. And it does this with less risk to you.

Knowledge, rather than being a scarce resource, is inexhaustible. Its available to anyone who has a mind for learning.

Its available to you if you want to move away from the wage scarcity model of industrialisation... especially if you have a determination to build a lifestyle based on future abundance.

Alvin and Heidi Toffler, authors of Revolutionary Wealth, had this to say about the current pace of economic change.

Imagine you're a policeman with a radar speed gun and you're tracking the speed of change of people and institutions...

This is what you'd find:

At 100 mph, the fastest cars would represent the fastest changing institutions... **business**. It needs to keep up with the speed of change or it becomes obsolete.

At 90mph: civil society and non-government organisations moving fast behind business.

At 60 mph, American families trying to catch up (but falling further behind)

At 30 mph trailing far behind: old industrially based Labour unions.

At 25 mph sputtering along: government bureaucracies and regulations.

At 10 mph, almost choking and shuddering: the American education system

At 5 mph: intergovernmental organisations such as IMF and WTO

At 3 mph almost at standstill: US Political institutions, Congress, and Political parties.

At 1mph, barely moving: The Law-the body of laws.

Is it possible for a 10mph school system to prepare children for a 100mph business asks Toffler?

The answer is clearly no...

Never in the history of humankind has there been the numbers of bankruptcies, sackings, unemployment, homelessness, destroyed production lines, closed businesses and social lock downs as we've experienced over the past 12 months.

Sadly, most people are unaware of what's happening to our financial systems. They're "waiting": "in hope". Hoping for the return to the "old normal" so they can get back to making money the old way.

But the "new normal" will not be a return to the "old normal"... too much has happened and we can't go back. The new financial system is happening at hyper speed.

Change is rippling through every aspect of lifestyle from wellness and longevity, through businesses and families, to economies, societies and nation states.

The more you understand about these economic changes, the more revenue you can learn to generate from these changes. More revenue means more lifestyle certainty for you, your family and those important to you.

Open Loop First Question...What is it?

And that's why I'd like to introduce you to ***Generational Wealth***...

It's a 12-month online training that lets you gain advantage from all the immediate and future changes taking place.

And you can do this training from anywhere in the world, at your own pace.

It covers all the wealth strategies you need for future security, confidence, independence, and lifestyle abundance.

Generational Wealth is delivered through a series of live weekly presentations... recorded and made available for download a few days later.

But perhaps you've seen too many wealth creation promises already.

Perhaps you're thinking that this is just another hyped up wealth promise... and I don't blame you.

Every time I open my email... there's another "get rich quick" scheme on offer!!!

I'm sure it's the same for you.

But rapid changes are taking place and they are real... there's no denying them.

And they're only going to increase over the next decade, not slow down.

So, why listen to me... especially when there are hundreds of “opportunities” being marketed every day?

It's a good question.

Open Loop Second Question...Who am I?

Allow me to introduce myself... my name is Paul Counsel... a once broke potter who transformed into a multimillionaire.

And that's the secret... most **opportunities** are presented by marketers, not necessarily people who have achieved wealth independent of what they want you to buy.

But that's not me.

I'm a self-made person who has created wealth independent of the opportunity I'm offering you. I've also created wealth from the very information I am offering you.

Here's a bit of my background.

Upon leaving school, I struggled with money just like most people.

Then one day, something happened to completely change the way I needed to think about money.

I simply didn't have enough and... I needed more.

The only solution I could see was to become a serious student of money itself.

And that's exactly what I did.

Fast forward a few years, after applying what I had learned from over 250 books, I was able to rocket my revenues to 7 figures.

If you're up for it...

If you're willing to learn... and apply what you learn, the only reason why you couldn't achieve similar results... are the doubts, disbeliefs and scepticism housed within your own mind.

However, if you believe in yourself, and if financial freedom is important for you and your family, you've already passed the blockages of most people.

I'll show you the system I've used every year for the past 20 years to achieve levels of success that others dream of.

I've used it to author and publish five books... several eBooks and hundreds of online knowledge programs.

I've used it to win a gold medal in marathon canoeing and set new time records...

I've used it to transform from penniless potter to multimillionaire...

I've used it to turn run down rentals into million-dollar mansions...

I've used it to turn lost health into new vitality...

I've used it to enter university as a mature age student and become the first person in Australia to be awarded a Doctorate in my field of study...

I've used it to win a prestigious Teaching Fellowship from one of Australia's leading universities...

I've used it to become a successful mentor to others.

I've used it to build and launch a new live blood wellness technology that won a significant Government grant.

I don't say any of this to brag, that's not my intention...

I'm detailing these achievements just to give you an indication of the power behind the lessons you'll learn and why it's worth taking an opportunity to apply them to your own set of circumstances.

Recently, my sense of urgency to share information has increased tenfold because of the rapid economic change and future uncertainty we're facing.

I want to give my knowledge to as many of you as I can so you can have more revenue now and more control and certainty over your future lifestyle.

With more control, you have more choice. With more choice, you have more independence and freedom along with future certainty, comfort and revenue predictability.

Claim...If Generational Wealth was just other “get rich quick” scam, I wouldn’t be putting my hard-won reputation behind it.

Proof 1...LinkedIn describes me as being in the top 1% of the most endorsed mentors in Australia because of my work in educating and mentoring people over the past 20 years with strategies that lead to financial freedom.

Proof 2...Hundreds of students have applied these strategies and now live in the space of financial freedom and independence.

Proof 3...About three months ago, I began sharing knowledge with a group of RealMVMT early adapters. Already, many are reporting large gains in revenues, profits and wealth.

Benefit...The step-by-step training you'll receive in Generational Wealth has proven itself over and over. It offers you both time and money saving because you'll know exactly what to do when, and you'll be guided every step of the way.

Like hundreds of families and individuals who did this training a few years ago, you'll be more relaxed about your future because of the benefits you'll gain.

There's nothing to fear and everything to gain. By applying what you'll learn, you'll do extremely well from the economic changes taking place.

If you decide not to learn, you might think you're playing it safe...

But, you'll be increasing your risk of getting caught on the wrong side of change.

That means worsening conditions for you and your family.

Financial Analyst and Professional Risk Manager Teeka Tiwari goes one step further and says, "Those who get left behind could slide into poverty."

Here's how I define risk...

"In any given context, risk is my probabilities of making ineffective choices."

The less knowledge and skills I have in any given context, the higher the risks I take.

To lower risk, I must increase my knowledge and skills in that context.

Here's something really important to understand...

...you don't increase risk by deciding to learn and expand your knowledge; you increase risk by deciding not to learn.

The greatest risk you take is achieved by not learning while lower risk is achieved through learning.

As soon as I realised what was taking place with this new generational wealth system, I set out to learn everything I could.

Learning allowed me to lower my risk of making ineffective decisions. As a result, I was able to become financially free in 3.8 years.

Claim...New Generational Wealth is already being achieved by those who see and embrace The Third Wave of Wealth.

Like many Baby Boomers, I left school at an early age and began labouring jobs. I became a potter in my late twenties. And by 40, I was dead flat broke!

Knowing things had to change, I started reading as many "How To Make Money" books as I possibly could.

Proof 1...By applying the lessons these books taught me... I made my first million in less time than it takes for many University degrees.

Proof 2...By using the same knowledge over and over... I've successfully built 4 different multimillion-dollar opportunities from the ground up.

Proof 3...By sharing my knowledge with others, hundreds of individuals and families are now living financially independent lifestyles.

And this is what I want for you.

Rapid change gives you opportunities for unprecedeted lifestyle “benefits” quicker than previous agriculture and industrial wealth systems.

Neither you nor your family need to wait for generational wealth to be passed on from your parents or previous generations. The new wealth system allows you to create wealth in a matter of years, not decades.

But... I know you probably won't read as many money-making books as I did.

Benefit...So, to help you succeed more quickly, I've packed every lesson I've learned into Generational Wealth so you can save time and money and achieve new results in a fraction of the time it took me.

Claim...You don't need \$100,000 university debts to become financially successful...

Proof 1...According to Forbes, 45 million US students are collectively \$1.6 trillion in debt. It's the second highest consumer debt category behind mortgages. But debt, for the hope of “better jobs” in cutthroat corporate environments... leads to unhealthy lifestyles and broken families more than it does to financial freedom.

Proof 2...University never taught you this. In 2000, an ounce of gold cost around the same price as a meal and wine at an OK restaurant. From 2000 to 2020, gold produced a 500% return. Over the same period, your wine and meal money returned 0%.

Imagine how well off you'd be today if someone taught you to spend some of your discretionary spending on gold.

Proof 3... The burden of University debt was nearly too much for Jane. After years of climbing the corporate ladder in a job she hated, Jane was ready to chuck it all in. She wanted greater independence and freedom, but the job couldn't give it to her.

So, she came to one of my trainings and learned how to create lucrative online incomes. A few years later, she fired her boss and has never looked back.

Benefit... When you work with highly successful people... their knowledge transfers to you for a fraction of the debt of higher education. You get tried and proven strategies that offer you confidence in your future and save you time and money getting there.

Rather than ending up with five or six figure debt, you gain inside knowledge that shortcuts your time to experience financial freedom.

Claim... *The new wealth system is causing rapid change to our deep fundamental relationships with time... space... and knowledge.*

Proof 1... Increases in the costs of living affect the way businesses and individuals experience both time and money. Access to free time decreases as the need to work more hours just to keep up with the pace of change increases.

“Families are working longer for their income... both husbands and wives work. Income has fallen in spite of a 50 percent increase in the number of second wage earners.” (The Agora)

In 1980, it took the average American worker 1,276 hours of work to buy an average new car. In 2018, an average new car cost 2,300 hours of work to purchase. (Rogue Economics)

Proof 2... Our relationship with investment “space” is moving from limited local and state opportunities to limitless international and global opportunities. We now have more choice and opportunity than previous generations.

Proof 3... We live in a time where more knowledge rapidly creates more knowledge. This means our relationship with knowledge is changing because knowledge is no longer scarce.

Benefit... Unlike any other asset class, which you can generally only sell once, your ability to profit from knowledge is infinite. You can sell it over and over to millions of people and make millions of dollars doing it.

Open Loop Third Question...What's in it for me?

This is how these changes advantage can you...

More knowledge gives you the ability to lower your risks and increase your profitability, faster than at any other time in history.

New Blockchain and Internet technology, offers unprecedented ease of access to global wealth generation.

Financial Analyst and Risk Manager Teeka Tiwari states... “One unstoppable trend is set to create 818,236 new millionaires over the next three years.” (Palm Beach Confidential Review)

One of the greatest secrets of wealth you’ve probably never been told is that...

“To create real sustainable wealth, you need to own the means of production.”

Read that again and let it sink in...

Within the agriculture system, the means of production was land and plough. Those who owned a lot of it and put it to good use, became extremely wealthy.

In the Industrial system, the means of production were factories and mass production. Those who owned a lot of it and put it to good use, became very wealthy.

In more modern times, the means of production is business. Those who own a lot of it and put it to good use become very wealthy.

Normally, you borrow hundreds of thousands, if not millions, to own and develop the means of production... the right land still works... the right factories still work, and the right businesses still work.

But now, for the first time in history, you have the chance to own the means of production at a fraction of the costs of previous generations.

With a computer and the Internet you have the means of production at your fingertips.

With the Internet, it costs almost nothing to produce and share knowledge.

Knowledge is infinitely leverageable. You can multiply its production and sell it a million times.

In fact, you and I can make millions from sharing the same knowledge.

Giving you my knowledge through Generational Wealth, doesn't mean that we become competitors or that are we rivals.

You can sell my knowledge over and over, but it won't affect my ability to sell the same knowledge anywhere in the world.

Learning how to monetise and leverage knowledge offers you opportunities for wealth faster than other generations.

Staying with the old systems keep you on wages and diminishes your experience of free time.

Futurists and authors Heidi and Alvin Toffler maintain that the further you move into the twenty-first century, the faster you'll experience the pace of change.

And the faster change happens, the more frustration and less free time you experience.

This happens because in rapid change situations, we're unwittingly encouraged to take on the labour of "**unpaid third jobs**".

Convenience is always positioned as time saving for you, but it's often the opposite.

You do baggage handling, check ins and ticketing for airlines. You do driveway servicing for air, water, oil checking and fuel for large petroleum companies.

You line up, wait... and then self-check all your purchases for supermarket conglomerates.

You now consume enormous amounts of time waiting in queues and listening to artificial intelligence telling how important you are, for companies who once provided you with human service.

The free customer service of banks has rapidly being replaced with fee for service ATM's.

Local, State and National service providers discourage you from collecting or fill out forms at the counter. Download them if you know where to look... and you know what the right form is... otherwise go to the back of the line please.

Take a ticket and wait has replaced staff of once proud service providers.

Trying to find someone with knowledge in department stores, electrical goods stores, and large hardware stores, just to name a few, is almost impossible.

When you take on the “**previously paid work**” of former employees, you carry out unpaid work for some of the world’s most profitable corporations.

Under the meme of convenience, more of your “free time” is consumed by unnoticed, ‘unpaid’ work doing labour for them.

The rapid pace of change means that sharing knowledge with others is more important now than at any other time in history.

Open Loop Fourth Question...How long will it take me to experience the benefits?

Here's a fact nobody tells you...

...you don't necessarily need more money to become wealthy because I'll show you how to multiply the value of the discretionary money you're already spending.

This one lesson alone could see you financially free in a few short years.

By thoughtfully applying the strategies you'll learn, the up stage of the next economic cycle will ensure your wealth comes faster than it did for previous generations.

This doesn't mean that you'll become wealthy within a matter of weeks.

Generational Wealth is not a “get rich quick scheme”, nor is it intended as such!

I’m talking about Generational Wealth here... not “Fastlane Money” or the “Dash For Cash”!

Generational Wealth is a 12 month program.

And somewhere in that 12 months, your future wealth starts building as soon as you apply the lessons you’ll learn.

Having said that, if you’re able to retrain your money psychology and emotions, the beginnings of wealth can happen quickly.

Open Loop...building a picture of perceived value...

In Generational Wealth, I’ll show you how to experience unparalleled advantages of new technology and the way future wealth is being created now.

I’ll show you how to change the way your mind works so you can move from a money spending brain to a money-making brain and make wealth happen sooner than previous generations experienced.

I’ll show you how new wealth is made, how to benefit from it, and how to enjoy the lifestyle experiences you’ll receive as a result of it.

Generational Wealth is “important”... if you’re sick and tired of money struggles and you’d like more comfort, independence and freedom sooner.

The problem with most wealth training is that it starts from a formula and tries to squeeze you into it.

But this never works because the individual YOU is not factored into the mentoring and coaching equation.

Generational Wealth is about building new psychological and emotional foundations to money so you can create the wealth and freedom you want.

Without rebuilding socially engineered money foundations, the enterprise you're trying to experience doesn't come quick enough...

It doesn't matter how many "How To" courses you attend, if you don't rebuild your socially engineered money foundations, you're always going to have money triggers that prevent you from creating wealth.

While the benefits of the Generational Wealth training are many, four stand head and shoulders over others.

The first is learning the latest neuroscientific techniques for rapid results and sustainable learning. Its literally the fastest way to move from work and spending lifestyles to freedom and abundance lifestyles.

The second is the very real possibility of boosting your revenues to levels that give you more independence and freedom.

The third is the real savings in money and time you'll experience.

The fourth, and perhaps most important, is that you'll never have to worry about being made redundant or your business going bust because of shutdowns.

You'll no longer stress thinking about all the money you've earned and spent over your lifetime.

You'll never have to remain indebted for years with university fees and spiralling interest payments.

You'll never be overqualified, too old, too young, or too inexperienced.

None of societies suffocating norms will apply to you. Generational Wealth is money making on your own terms.

Here's something I need you to think about...

If it's possible for you to spend decades earning and spending all the money you earn and not get close to wealth...

...is it possible to commit yourself to weekly training sessions so you can have more confidence, certainty and abundance in your future?

If the answer is no, then this is not a journey for you.

If the answer is yes... the lifetime value to you is priceless. Welcome to Generational Wealth.

Its starting within a matter of weeks from now.

Here's exactly what you'll learn with Generational Wealth...

- We'll start by showing you how to multiply the value of the money you already earn. If you only ever apply this one lesson... your wealth future is assured.
- Then I'll show you the strategies I used to transform from penniless potter to a multimillionaire. By applying two techniques revealed by new neuroscientific research into adult learning... you can achieve similar results.
- An incredibly important subject you'll learn is understanding why mindset holds you back... and WHY it prevents you from becoming financially free! Mindset = "habits of mind formed by previous experience" ...from the word mind (n) = conscious intellect... & set (v) = to fix firmly!
- Mindset ensures you spend money rather than accumulate money. I'll show you how to move from a spending mind to an accumulating mind so you can burst through your own subconscious money limits.
- You'll have light bulb moments all over the place as you realise why things haven't worked for you in the past and which steps you need to take now.
- You'll learn why we're being sucked into a tsunami of change that's destroying old wealth systems and creating a new system termed The Third Wave. The unprecedented speed of change means you must quickly adapt to its consequences.
- You'll learn that the fastest way to future wealth is through the development of intangibles... described as nonphysical sources of

value that produce positive psychological, emotional, physical and spiritual enrichment.

- Intangibles often interact with tangible financial assets to create increasing amounts of corporate value and economic profit. You'll learn why exponential growth and reward are gained through product and service personalisation.
- I'll teach you how to use the value of precious metals such as gold, silver, platinum and palladium to protect your existing assets so that you don't lose value during the next market crash.
- I'll share my favourite crypto currencies, why I like them and why I believe they'll do well in the future. I'll show you where to look for information... and which ones are likely to have future success.
- You'll receive the shortcuts I've developed over the years to save you time, money and heartache by trying to figure out everything by yourself.
- You'll learn about money's Consumption Code and how social engineers use it to keep you in debt and working in jobs and careers without experiencing freedom.
- If you don't have the right money code in place, you can't build long lasting wealth. Even if you inherit, or win lots of money, without the right money code in place, research says you'll quickly lose it.
- You'll learn that during the Industrial Revolution, money was given to workers in exchange for their time and labour. But the Captains of Capitalism... wanted this money back as quickly as they could get it.
- To achieve this, they placed a lie into the consciousness of workers... that you can work for 30 to 40 years; then use a big payday at the end to buy back your life so you can experience the freedom of your dreams. But of course, it never happens.
- I want to make it clear that your money results operate according to socially engineered money programs. They're reinforced by socially engineered spending patterns as a way of transferring money back into the hands of the rich.

- You'll learn how they achieved this lie by engaging social engineers such as Edward Bernays to develop ingenious ways to get more people to spend more money more often... and why for the last 100 years, it's worked perfectly well.
- You'll learn about the causes of economic cycles... and how to capture value in the right part of a cycle.
- You'll learn why economies move, grow, contract and cycle from high to low and then low to high again. Markets expand when easy credit is available and contract when credit is difficult to get.
- You'll learn why economic cycles are always influenced by the needs of both debtor and creditor classes. Unless you're an educated and savvy investor, in the long-term, the creditor classes always win.
- I'll show you how to use this knowledge to develop your very own Lucrative Online Income. It's a 16 module, step by step system I've used to generate high multiple six figure incomes every year since being online.
- You'll discover how neuroscientific research is re-writing the rules for cutting edge financial success... When, the primal emotional sections of our brains are triggered, they react in milliseconds at a precognitive level. I'll show you how to use this knowledge to create speedier profits.
- When you apply this learning, you'll understand why Wallace D Wattles said... "You don't get rich by doing certain things; you get rich by doing things in a certain way."

Generational Wealth... has three unique features that create more certainty in your ability to succeed.

First, it's a step-by-step action plan for financial success...

Second, it offers the experience of mentoring sessions so that Keegan Smith and myself can help you manage the confusing parts of change more easily.

Third, the focus is on you and your needs. You'll have fun with a group of likeminded people and be inspired by some of the world's leading ideas from different walks of life.

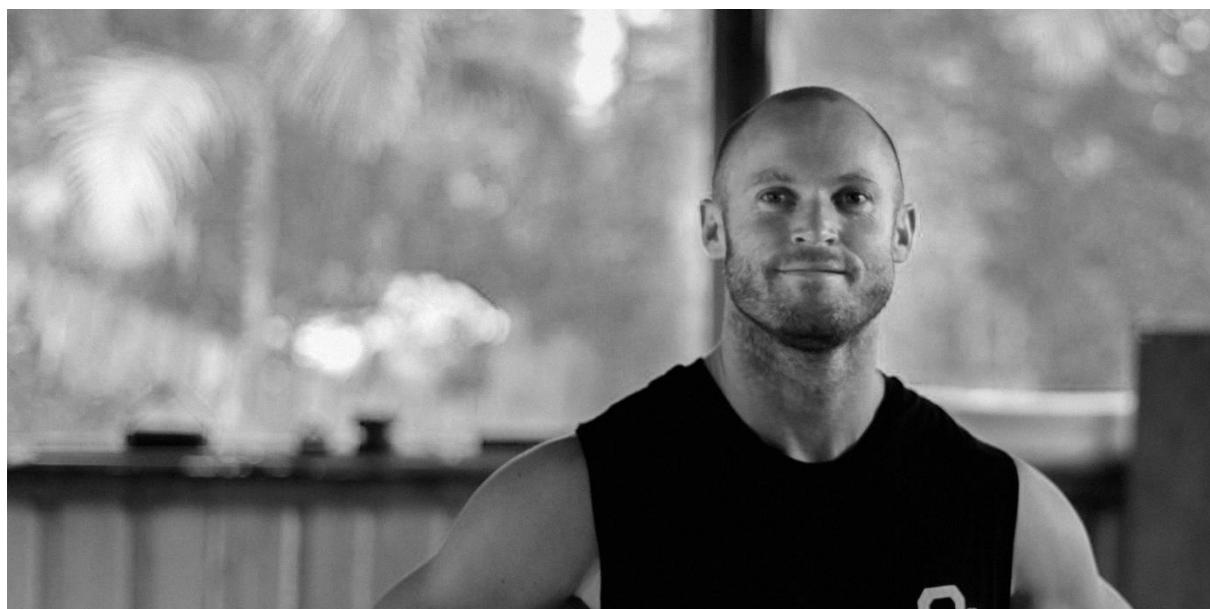

Open Loop...Offer proof of why and how what you're offering works...

Others are achieving success... why not you? Here's what some RealMVMT members have had to say about their journey so far.

Keegan Smith... “In the last 18 months I've gone from \$600,000 in debt to having \$1,000,000 worth of assets and 10x my income. Most of this growth has happened since working with Paul 6 months ago.

“Beyond the money, what I've learned from Paul has changed my outlook on life and opened me up to a future I didn't think was possible.

“Naturally, I wanted my 500+ students to have access to this knowledge. For the last 4 months we've had a group of 50 committed students making massive changes in MONEY and MIND. Now I want to make Paul available to you too!”

Open Loop...Place your best guarantee here...

Relax... sleep easy... we get it! We've got you covered...

We understand that you might be uncertain about whether the Generational Wealth program is for you... and that you might want to trial it to see if it suits your future needs.

We get it. We want you to sleep easy if you decide to join us on this program.

Both Keegan and I (Paul) want to give you as much reassurance as we possibly can about the quality of the Generational Wealth program...

And there's two ways we can do this.

One is to guarantee that what you learn has a proven track record of success behind it.

Another is to give you peace of mind by fully guaranteeing your investment of time and money in Generational Wealth.

We want to give you 100% confidence by offering you our rock solid, sleep easy, confidence boosting, risk depleting, 100% money back Guarantee...

If, after 30 days you're not completely satisfied by the content we're delivering, please ask for your money back.

...100% money back GUARANTEE.

We wouldn't offer you "Generational Wealth" if we didn't feel that it could make a profound difference beyond that of any similar product on the market.

We guarantee that we will serve you better, more attentively and more consciously than anybody else. We guarantee that we will do everything in our power to ensure that your best interests, your needs, your fulfilment, and your satisfaction are our #1 priority.

We guarantee to offer you information and knowledge that is always in your best interests. You'll be treated with respect all the way through the Generational Wealth program. And we'll never let you do anything that would be detrimental to you.

Open Loop...Add bonuses to help speed success...

The most valuable bonuses we can give you...

Bonus... One of the most valuable bonuses we can give you is our time. At the end of each live weekly session, we'll spend anywhere from one to two hours with you for live feedback and Q&A's.

Ask any question you like...

Generational Wealth is not just a program where you buy a series of video's and mp3's and then never hear from the program creator again until they want you to buy something else.

An additional bonus you get from live Q&A's is being part of a group of likeminded individuals who share their experiences of the learning with you.

Through the act of sharing, you get the experience of a mastermind group. And you get the experience of being motivated by others on each step on your unique journey.

Together, we'll all make sure you're doing the right things at the right time.

And to save you time with note taking, after each weekly session, you'll get access to the full set of slide notes and images used for that session.

Close and call to action...

Let me invite you to join Generational Wealth by offering you the greatest secret to wealth you'll ever learn...

And this is where the process of wealth creation breaks down for most people.

Over the past 22 years of teaching various aspects of wealth creation... the people I meet the most are those who want independence and financial freedom in their external world... BUT... maintain a state of fear, uncertainty, doubt, disbelief, and scepticism in their internal world.

Any mismatch between how you think and feel internally and what you want externally... prevents forward progress from happening.

“In order to create wealth, you must match your internal state to the external outcome you want to achieve”.

You can't create on the outside what your brain doesn't want to create on the inside.

Let me slip into some neuroscience to explain why this happens...

Hope you don't mind.

Neuroplasticity states that your brain is adaptable and can change itself in response to its environment... no matter what your age.

But there's a catch... the best time for wealth learning is when you're young.

From zero to age 25, your brain, its ever changing, is extremely malleable and does most of its learning easily.

Expose your brain to almost anything and it will wire up to that environment. But wealth is not taught to young people.

If you've already passed this age, learning is somewhat more challenging...

But here's the good news...

...by getting two things working for you... you can stimulate your brain to achieve anything you focus on.

When it comes to money, let's say you want to become more wealth functional instead of spending functional...

Step 1... Bring deliberate focus to what you want because neuroplasticity in adults is triggered by intense focus.

Deliberate focus produces a chemical messenger in your brain called acetylcholine. It plays an important role in brain function, mental processing and cognition.

When you think with focus, acetylcholine is released by the Nucleus

Basalis, which contains the largest collection of acetylcholine neurons in your brain.

When your Nucleus Basalis releases acetylcholine, it marks your precise focus neurons as being ready for change.

The power of focus is literally your entry point trigger to the wealth creation outcome you want.

Step 2... Develop a sense of urgency for things to happen. When you really commit to digging in and learning, you encourage your alert system to produce norepinephrine, a chemical messenger similar to adrenaline.

Norepinephrine produces a state of awareness that brings your attention to thinking specifically about what you want to achieve... your specific wealth outcome for example.

By stimulating your **alert** and **focus** systems at the same time, acetylcholine and norepinephrine converge to mark your brain synapses as ready for adaptation.

And this is where learning becomes much easier for adults.

But, if you don't bring these two systems together, wealth will not happen for you, no matter how many books you read or seminars you attend.

Urgency and **focus** must converge in order to experience future generational wealth.

And that's exactly what Keegan and myself will encourage you to do.

Apart from learning various topics and strategies, by joining Keegan and myself on the Generational Wealth training, you'll have our support every step of the journey.

We'll keep you focused and on track.

We'll keep reminding you of the importance of future abundance and financial independence in a rapidly changing world.

Your opportunity to invest in Generational Wealth has everything to do with you and your future. It has the potential to make you more successful, more confident, and more financially independent than you've ever been before.

One thing is for sure, because Keegan and I both bring ***focus*** and ***urgency*** to our goals, we continue hitting our goals with absolute certainty.

That's how Keegan was able to move from \$600,000 in debt to having \$1,000,000 worth of assets and 10x his previous income in such a short time. "Most of this growth has happened since working with Paul 6 months ago."

So come along and join us and we'll be able to support you.

If you hate your job... we'll help you fire your boss.

If you haven't got enough savings for your future... we'll help you get more money.

And if you're scared about losing your job in this climate of rapid change, we'll help you develop new income streams that could provide you with financial independence.

By deciding to invest in your future money skills, we'll be here to help you with your new dream home, car or lifestyle.

And if you have a business, we'll help you grow it so you can have greater impact on those around you.

If you want to start an online business, our 16 module Lucrative Internet Income will teach you everything you need to know.

And if you want to increase your coaching sales... or develop another income stream, we can certainly help with that too.

If you want more information... contact Keegan Smith on ????
